

International Certificate of Fitness for the Carriage of Liquefied Gases in Bulk

Issued under the provisions of the International Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk under the authority of the Government of the Republic of Malta by Lloyd's Register Asia

Particulars of ship

Name of ship	ARCHIMIDIS
Distinctive number or letters	9HA5868
Port of registry	VALLETTA
Cargo capacity (m ³)	172933.4
Ship type (Code paragraph 2.1.2) ¹	2G
IMO number	9975325
Date on which keel was laid or ship was at a similar stage of construction or, (in the case of a converted ship) date on which conversion to a gas carrier was commenced	04 March 2025

The ship also complies fully with the following amendments to the Code:

Resolutions MSC 370(93), MSC.411(97) and MSC 441(99)

The ship is exempted from compliance with the following provisions of the Code:

Not applicable

This is to certify:

1. that the ship has been surveyed in accordance with the provisions of section 1.4 of the Code;
2. that the survey showed that the construction and equipment of the ship and the conditions thereof are in all respects satisfactory and that the ship complies with the relevant provisions of the Code.

*** that to complete the Initial survey, see outstanding items on Form 2220S - Supplement to the International Certificate of Fitness for the Carriage of Liquefied Gases in Bulk, Record No. 2170691/01**

** Initial survey only - delete as appropriate.*

Lloyd's Register Group Limited, its affiliates and subsidiaries and their respective officers, employees or agents are, individually and collectively, referred to in this clause as 'Lloyd's Register'. Lloyd's Register assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

.1 ambient air temperature

5 (USCG -18 C) °C²0 (USCG 0 C) °C²

.3

Cargo Piping

4 Mechanical properties of the cargo tank materials were determined at **Not applicable** °C⁵

4. That the ship is suitable for the carriage in bulk of the following products, provided that all relevant operational provisions of the Code are observed⁶:

[illegible]

Cargo Tanks Total Capacity:

Stated above cargo capacity of 172933.4 m3 corresponds to cargo tanks of total capacity at maximum filling limits by volume as specified in paragraph B) at reference temperature including liquid domes.

Cargo Tanks Loading Conditions:

- A) Cargo should not be loaded to a filling height outside of GTT's recommended standard filling limits: above 70%H and below 10%H with H being the height of the tank at the primary barrier level.
- B) Cargo should be loaded in accordance with approved Cargo Tank Loading Limits Tables (N420 TANK ANA 1.17L Rev.01) retained onboard and in accordance with the requirements of IGC Code Chapter 15.

Maximum Filling Limits:

Cargo Tank No.1: 99.35%
Cargo Tank No.2: 99.35%
Cargo Tank No.3: 99.35%
Cargo Tank No.4: 99.35%

NOTE: Tank numbers referred to in this list are identified on the attached tank plan.

5. That in accordance with sections **1.3/2.6.2*** the provisions of the Code are modified in respect of the ship in the following manner:

Not Applicable

6. That the loading and stability information booklet required by paragraph 2.2.5 of the Code has been supplied to the ship in an approved form;
7. That the ship must be loaded:
- .1* only in accordance with loading conditions verified compliant with intact and damage stability requirements using the approved stability instrument fitted in accordance with paragraph 2.2.6 of the Code;
 - .2* ~~where a dispensation permitted by paragraph 2.2.7 of the Code is granted and the approved stability instrument required by paragraph 2.2.6 of the Code is not fitted, loading shall be made~~ in accordance with one or more of the following approved methods:
 - .i* in accordance with the loading conditions provided in the approved loading and stability information booklet referred to in 6 above; or
 - .ii* ~~in accordance with loading conditions verified remotely using an approved means~~ _____; or
 - .iii* ~~in accordance with a loading condition which lies within an approved range of conditions defined in the approved loading and stability information booklet referred to in 6 above; or~~
 - .iv* ~~in accordance with a loading condition verified using approved critical KG/GM data defined in the approved loading and stability information booklet referred to in 6 above;~~
 - .3* in accordance with the loading limitations appended to this Certificate.

Where it is required to load the ship other than in accordance with the above instruction, then the necessary calculations to justify the proposed loading conditions should be communicated to the certifying Administration who may authorize in writing the adoption of the proposed loading condition.

This certificate is valid until **01 November 2026** subject to surveys in accordance with section 1.4 of the Code.

Completion date of survey on which this certificate is based **02 June 2026**

Issued at **Mokpo** on **02 June 2026**
